

Audio first. *Hands free.*

Tap play, put the phone in your pocket, and test how the feed moves without looking at the screen.

Sample content only | 10 seconds is the quick demo timer

Swipe to skip

Swipe up for the next post. Swipe down for the previous one.

One-tap repeat

Choose Off, Once, or Until skipped for long listens.

Pocket safe

Lock the screen, then slide up to unlock when you stop.

Watch / headset ready

Use earbud or watch controls for remote playback and skipping.

Anyone can open this browser demo without a ChatGPT account.

WHY USE IT

Keep the phone silent. *Keep your purpose loud.*

Active Audio turns the social feed into a hands-free companion, so eyes stay on the route, the workout, or the moment in front of the listener.

ACTIVE LISTENING USE CASES

01

Running + indoor runs

Affirmations, podcasts, news, and trending clips without breaking stride.

02

Cycling + training

Sports headlines and short updates while hands stay on the bars.

03

Climbing + riding

Listen only in safe, low-attention moments and keep the screen locked.

04

Everyday movement

Gym work, commuting, warmups, stretching, or any activity with a place to attach the phone.

PRODUCT PROPOSAL

Instagram Active Audio

An optional audio-first mode for Reels and posts for runners, cyclists, gym users, commuters, and active users.

CORE FUNCTIONS

- Audio-only playback with the screen locked
